CATTLEYAS - SPRING AND SUMMER 1952

Hawaiian bred Cattleyas are produced with one major purpose in mind -- QUALITY. For the finest in exhibition type plants we believe this list is most comprehensive. All plants are sturdy and strictly true to name and as represented. We do not heavily fertilize our plants as we believe a hard firm growth gives the purchaser an easier plant to adjust to his own conditions. Our plants are hard grown and respond quickly to such changes. For your guidance we list an average measurement of what can be expected on our plants with regards to size. All crosses do not grow equally and such a growth chart is an average only.
